S.No	0.	Criteria	Compliance (S/I/N)	Remark
	1	Prospecting		
		Data Collection		
1.1.1		Ability to capture data about prospect (Name address, contact nos., needs)		
1.1.2		Information relating to prospect from insurance perspective. E.g. property details,		
1.1.2		occupation, business volume and business potential		
1.1.3		Checking De duplication of customer names.		
1.1.4		Maintaining Credit limits for each customer.		
1.1.5		Alert on Customer Credit Limit and Time Limit if they are exceeded then the systen should		
1.1.5		prompt while underwriting next proposal		
1.1.6		Aging Report for customer monthly , qurterly , yearly etc.		
1.1.7		Facility for blocking by each transaction wise with specific stop list ex. By renewals, by new		
1.1.7		policy etc.		
	1 2	Customer Interaction		
1.2.1	1.2	Renewal rules for policy due for renewals.		
1.2.2		E-communicate with prospect through various channel viz. email, SMS		
1.2.3		Facility for sales force to work offline and later synchronise data with the main system		
1.2.3		racinity for sales force to work offline and later synchronise data with the main system		
	2	Quotation Management		
		Channels		
2.1.1	2.1	Ability to provide quotations through various channel viz. email, web, SMS, fax		
2.1.1		Thomas to provide quotations unrough various thanner viz. entail, web, sivis, lax		
2.1.2		Ability to record both direct/RI inward quotations		
٢.1.٢	22	Quotation Handling		
2.2.1	2.2	Different quotation screens for different classes of business		
2.2.2				
2.2.2		Quotation covering more than one class of business (multi section) Quotation for open cover/ open policy/declaration policy / floater policy and master policy		
2.2.3		Equotation for open covery open policy/deciaration policy / floater policy and master policy		
2.2.4		Auto configurable quotation screen with minimum fields required for generation of quote		
2.2.4		Auto configurable quotation screen with minimum fields required for generation of quote		
2.2.5		Allow printing / reprinting of Quotation		
2.2.6		Allow ability to store extensive notes (may be external documents) & retrieve same when		
		required.		
	2.3	Premium Computation		
2.3.1		Calculate premium as rate times sum insured or flat premium (e.g. for public liability)		
		,,,		
2.3.2		Calculate premium using rate table		
2.3.3		Calculate premium for Countryn tariff business as applicable		
2.3.4		Ability to override system calculated rates		
2.3.5		Calculate premium including Loading, Discounts, charges, tax		
2.3.6		Premium based on rating rules		
	2.4	Quotation Follow up and services		
2.4.1		Record client or agents response		
2.4.2		Quotation closure if required, with final closure remark		
2.4.3		Ability to define/modify a workflow process for quotation follow-up		
2.4.4		Implementation of maker-checker concept i.e. data entry, proofing, quality control,		
		approval & posting can be implemented through different user lds		
	2.5	Quotation History		
2.5.1		Maintain history of quotations to a prospect		
2.5.2		Keep record of quote images		
2.5.3		Generate automatic reminders for quotations issued which need facultative reinsurance		
		,		
2.5.4		Allow order retrieval by order number, date, proposer or source		
	2.6	Quotation Conversion		
2.6.1		Convert quotation/proposal to policy without re-entry of data		
	2.7	Quote Iteration		
2.7.1		Ability to maintain multiple iteration in case if minor changes to be done in quotation.		
L				
2.7.2		Maintaining iteration sequence number under single quotation number.		
2.7.3		Ability to convert any version of quote to policy.		
	3	Policy Management		
	3.1	Channels		
3.1.1		Handling of proposal from different channels viz. customer direct, brokers, agents, point of		
		sales, branch, authorised agents, electronic means (email, web)		

3.1.2 Agents and b	
	prokers can access proposals online
3.2 Proposal Ha	ndling
	direct proposals
	ndle coinsurance inward, both as leader as well as participant, with multiple
coinsurers	nate constraince invarie, sources as well as participants, with markiple
	ndle coinsurance outward-As leader as well as participant, with multiple

3.7.6	Maker-checker authorization can be implemented for policy data entry and posting		
	processes (viz data entry, quality check, underwriting and final quality check can be		
	implemented through different users ?)		
3.8	Policy Documentation		
3.8.1	Attach standard policy wordings, clauses and facility to add new clauses.		
3.8.2	Facility to search for standard warranties and clauses using key terms		
	,		
3.8.3	System generated certificate for motor, marine cargo transit, Travel		
3.8.4	Ability to email or fax policy documents from the system, as PDF files		
3.8.5	Print and reprint of policy		
3.9	Stamp Duty Handling		
3.9.1	Calculate stamp duty as per QATAR Regulation		
3.9.2	Issue alerts for insufficient balances in the stamp duty account		
3.10	Cover Note		
3.10.1	Record issuance of new cover note books to dealers/ agents		
3.10.2	Provide separate Covernote for different products		
3.10.3	Allocation to branches / classes / departments / agents / brokers		
3.10.4	- update of used / unused cover notes		
3.10.5	Facility for issuing cover notes by authorised channel viz. agent, point of sales and branch.		
5.10.5	racinty for issuing cover notes by authorised channel viz. agent, point of sales and branch.		
3.10.6	Authorization for cover note issuance		
3.10.7	Reconciliation for physical stock vs system stock		
3.10.8	,		
3.10.9	Validation of cover note period / agent / branch / broker during cover note issue / policy		
3.10.10	issue Allow update of individual cover notes / cover books for cancellation / reinstatement / lost		
3.10.10	Allow appeare of individual cover notes / cover books for cancellation / remistatement / lost		
	On an Control Mantage of the I Bellister with deviations		
	Open Cover/ Master policy/ Policies with declaration		
-	Open Cover		
4.1.1	Handling of marine open cover with facility to issue certificates and enter shipment details		
	for each voyage and generate documents.		
4.1.2	Alerts in case declaration is above specified limit.		
4.1.3	Alerts in case per shipment limit is exceeded		
4.2	Master Policy		
4.2.1	Handling of master policies with facility to maintain insured details, risks covered.		
4.3	Declaration Facility		
4.3.1	Handling of floater, floater declaration, declaration policies with premium rating and		
-	facility to collect declaration details		
4.3.2	The system should be able to track the status and progress of each Declaration by		
7.5.2	geography , role etc.		
4.3.3	Ability to analyze the uploaded Declarations with the help of business rules and flag for		
4.3.3			
	any discrapancy's.		
4.3.4	The system should have the capability to push the KYC documents in the system and tag		
	the documents to User ID and declaration/proposal.		
4.4	Transaction Handling		
4.4.1	Handling of cheque, cash deposit or other transaction mode applicable in QATAR		
4.4.2	Cash deposit link to open cover / open policy/ master policy for premium debit.		
4.4.3	Alerts / report in case of insufficient premium, available declaration reaching cut off level		
	or open cover available limit reaching cut off limit		
4.4.4	Facility to replenish declaration, open cover or master policy limit through endorsement		
1			
5	Policy Administration/ Endorsements		
5.1	Types of Endorsement		
5.1.1	Increase/ decrease in sum insured		
	Risk addition/deletion		
5.1.2			
5.1.3	Section addition/deletion		
5.1.4	Peril (cover) addition/deletion		
5.1.5	Policy transfer		
5.1.6	Name / address change		
5.1.7	Policy cancellation		
5.1.8	Short-term cancellations	·	
5.1.9	Policy reinstatement after cancellation		
J.1.J			
5.1.10	Mistake correction, after policy issue		

5.1.11	Change in policy terms and coverage, including risk covered, ab-initio or as endorsement	
5.1.12	Addition / deletion of clauses	
5.1.13	Eendorsements for Open Cover / Master Policy, Declaration policies., multi-currency SI)	
	· · · · · · · · · · · · · · · · · · ·	
5.2	Premium Computation	
5.2.1	Calculate additional/returned premium	
5.2.2	Rating for different endorsements, including on short term and pro-rata basis, or based on	
3.2.2	specific tables. Applicable for non-tariff and products governed by market agreement.	
	specific tables. Applicable for fron tariff and products governed by market agreement.	
5.2.3	Premium check for specified lines of business during endorsement process.	
5.2.4		
	Functionality for cash before cover issuance. Endorsement Information	
5.5	Endorsement information	
5.3.1	Record endorsement dates with different effective dates for diff risk / item / coverage /	
5.3.1		
	premium.	
5.3.2	Recording of date of request for endorsement	
5.3.3	Ability to select pre-defined clauses to be printed in the endorsement document	
<u></u>		
5.3.4	Ability to type a new clause with non-standard wording	
	Endorsement History	
5.4.1	Maintain history of endorsements and ability to query/ view each endorsement as well as	
<u> </u>	original policy	
5.4.2	System to retain latest versions of policy documents along with old versions	
	Risk Management	
5.5.1	Allow adjustment of reinsurance arrangements when endorsement processed	
5.5.2	Provide check of risk accumulation at endorsement	
5.5.3	Allow endorsement on expired policies	
5.5.4	Different authorization limits / access for endorsement by product types	
5.6	Service Enhancement	
5.6.1	Allow online request for endorsement by client / brokers	
5.6.2	Customer self service for simple endorsements for specific customers / brokers. System	
	check before allowing endorsement through self service option	
5.6.3	Implementation of maker-checker concept i.e. data entry, proofing, quality control,	
	approval & posting can be implemented through different user lds	
6	Reinsurance Outward/ Coinsurance Outward	
	Reinsurer set-up	
6.1.1	Maintenance of reinsurers' details	
6.1.2	Maintenance of reinsurance rules for treaties - Quota share, Surplus, XOL	
	Reinsurance Processing	
6.2.1	Process- reinsurance - UnderWriting	
6.2.2	Allow use of as many reinsurers as required, specifying percentages reinsured and rates	
	· · · · · · · · · · · · · · · · · · ·	
6.2.3	Compulsory cession functionality	
6.2.4	Process- reinsurance - Claim - XOL(Excess of Loss)	
6.2.5	Retrocession in respect of business received by other insurers in Country, up to specified	
	limits	
6.2.6	Process- reinsurance – Claim	
6.2.7	Record reinsurer's reference number	
	Reinsurance Premium	
6.3.1	Calculate reinsurance premiums, commissions and percentages retained	
6.3.2	Facility for installment premiums on outward reinsurance	
	Reinsurance Documentation	
6.4.1	Generate RI slip/ closing slip for facultative business	
6.4.2	Optionally produce credit notes for each reinsurer and post accounting entries	
-		
6.4.3	Generate bordereaux for each treaty / participant	
6.4.4	Produce balances per reinsurer in respect of premiums and losses per line on facultative	
	and treaty basis	
	Integration with Underwriting	
6.5.1	Facility to automatically process reinsurance at a time of processing the original insurance	
	policy and also at the time of passing endorsements (e.g. for compulsory treaties)	
	Co Insurance Outward	
6.6.1	Facility to arrange Co insurance outward with multiple insurer with appropriate sharing.

	includes salvage and recoveries through legal process	
8.2.25	On recovery and subrogation, allow prompting for follow-up	
8.2.26	Allow entry of recovery reserves in claim record	
8.2.27	Facility to distribute workload through workflow allocation	
8.2.28	Claim Reserving entries for the year end accounting.	
8.2.29	Self service through kiosk / internet/other mode of communication for claim status	
0.2.23		
	inquiries	
8.2.30	Ability to define comprehensive workflow process for claims processing	
8.2.31	Implementation of maker-checker concept for claims & claims payment processing i.e.	
	data entry, proofing, quality control, approval & posting can be implemented through	
	different user lds	
8.3	Claims Documentation	
8.3.1	List of documents needed for claims, per line of business	
8.3.2	Record of documents called for, status and dates for tracking and TAT analysis	
8.3.3	Record of correspondence with claimant and service providers (Garage / Adjustor / lawyer	
	etc)	
8.3.4	Facility to record and store various reports/ scanned images, recommendations,	
0.3.4		
	documents, bills, evidences and picture images etc.	
8.3.5	Produce claims statement and payment voucher for settlement of claims, surveyor	
	fees,solicitors'fees,etc	
8.3.6	On payment of claim generate advice and debit note to reinsurers	
8.4	Salvage Processing	
8.4.1	Facility to record salvage at time of claim processing.	
8.4.2	Facility to record salvage location	
8.4.3	Facility to record salvage expenses and estimates	
8.4.4	Facility to register salvage quotation for disposal	
	Claims Recovery	
8.5.1	Facility to record claim recovery details	
8.5.2	·	
	Facility to record legal case for claim recovery	
8.5.3	Facility to register final settlement details	
	Others	
8.6.1	Claim made above the Limit set by the OICL team will initiate the workflow and wil be	
	redirected to higher authority for approval	
8.6.2	Alert in the system notifying the user has exceeded the limit to settle the claim	
8.6.3	Benchmark for generating the alert for claim threshold limit and subsequent alert once the	
	threshold is reached	
q	Accounting	
	Transaction (Excluding Collections)	
9.1.1	Allocate premium to reinsurers	
9.1.2	Allocate premium on quota share pooling arrangements	
9.1.3	Allow for billing and payment of premium by installment	
9.1.4	Provide monthly reconciliation of ledger balances with statement of accounts to treaty	
	reinsurers	
9.1.5	Analysis and preparation of due to/from reinsurers for the interim and year end closing	
9.1.6	Computation and preparation of the premium adjustment of actual as against minimum	
	and premium paid to reinsurers	
9.1.7	Preparation of Profit Commissions to outward treaties	
9.1.8	Provide reinstatement premium computation sent by reinsurers	
9.1.9	Generation of payment instructions interface file to integrate with third party system.	
3.1.3	denotation of payment instructions interface the to integrate with third party system.	
	Lodgors	
	Ledgers	
9.2.1	Ledger and Sub Ledger Creation	
9.2.2	Automatic posting of accounting entries to GL Link file for all financial transactions	
1		

9.2.3	Error handling, including reversals, during batch extraction or subsequent posting in to the	
	GL	
9.3	Accounting Controls	
9.3.1	Provide monitoring control for payments of commissions and refund premiums	
9.3.2	Control of number series - policy, bills, statements, endorsements, official receipts, checks,	
	vouchers	
9.3.3	Provide control on authority limits of signatories	
9.3.4	Control to prevent double payment/booked accounts and unsupported transactions	
9.3.5	Verification of all supporting documents on all check vouchers issued	
9.3.6	Ability to define comprehensive workflow process for different account processes	
3.3.0	Thanky to define comprehensive worknow process for different decount processes	
9.3.7	Implementation of maker-checker concept for accounting processes i.e. data entry,	
	proofing, quality control, approval & posting can be implemented through different user	
	lds	
9.4	Other Accounting Requirement	
9.4.1	Balance Sheet : The summary of financial position (assets and liabilities etc.) as of date

	year for a specific period with those of the last year for the same period.	
9.4.4	Income and Expense Statement: Gives summary of surplus or deficit for the period	
0.4.5	Main Assessate Trial Delayers Marchill, election belongs debails for Main A/a Codes and	
9.4.5	Main Accounts Trial Balance: Monthly closing balance details for Main A/c Codes and	
	monthly closing balance details for Division, Department and Main A/c Codes. System should Verify the Double Entry Book Keeping in terms of Division and Main A/c	
	System should verify the Double Entry book keeping in terms of Division and Main A/C	
9.4.6	Sub Account Trial Balance: Monthly closing balance details Sub A/c Wise. The report	
	displays only those Main A/c that have Sub A/c.	
9.4.7	Main A/C Trial Balance(Posted And Unposted): The balances for posted and unposted	
	summary separately	
9.4.8	Main A/C Trial Balance With Annual Figure (YTD): The balance on year to date with a	
	comparison of previous year and current year.	
9.4.9	Petty Cash Disbursements Pending Reimbursements: Cash disbursement vouchers based	
	on Petty Cash Number.	
9.4.10	Petty Cash Reimbursements during Period: Petty cash reimbursement received during a	
	given period.	
9.4.11	List of Transactions Detailed: details of account-wise transactions based on status and due	
	date and obtain the value of the transactions in Local Currency and Foreign Currency by	
9.4.12	Account General Ledger LC: Synopsis of the volume of local currency transactions during the period	
3.4.12	for the Main A/c Code and analyze the local currency transactions utiling the period	
	departments and Main A/c codes	
9.4.13	Sub Ledger Local Currency: report provides a synopsis of the volume of local currency	
	transactions during the period for Sub A/c codesand analyze the local currency	
	transactions in relation to divisions, departments and Sub A/c codes	
9.4.14	Consolidated Account Wise Summary: provide Main A/c and Sub A/c summaries on a daily	
	and transaction status basis and retrieve transactions by specifying an amount in the	
	Amount Over-limit field	
9.4.15	Missing Voucher Number List: the list of missing transactions	
9.4.16	Allocation JV Details: analyze the amount of expense JVs allocated on the basis of Prepaid	
	Main A/c codes for a given period and details of prepaid expenses for a given period	
9.4.17	General Ledger Foreign Currency: synopsis of the volume of foreign currency transactions	
0.4.10	during the period for the Main A/c Code	
9.4.18	Sub Ledger Foreign Currency: synopsis of the volume of foreign currency transactions	
9 / 10	during the period for Sub A/c Codes Rank/Cash Position Report: account wise summary of deposits, withdrawals and current	
9.4.19	Bank/Cash Position Report: account wise summary of deposits, withdrawals and current closing balances during a particular period. When tracking the movement of transactions,	
	the opening balance is also included.	
9.4.20	Voucher: vouchers posted or unposted based on transaction code and document number	
3.7.20	1. Sacrets posted of anyosted based on transaction code and document number	
	1	I

9.4.21	List Of Processed/Unprocessed Txns: list of posted and unposted documents in the system		
9.4.22	Journal and Other Day Books: list of processed transactions alone by Transaction Code,		
	Document Number or Document Date and transactions is mapped with related ledger		
	accounts like GRN register and cash accounts to verify the status		
9.4.23	Activity Analysis :		
	Main Account details by Particular Main Activity Head (based on the selection criteria) for		
	a selected range of divisions and departments within a selected period.		
	All the transactions for each Main A/c along with department and division totals based on		
	the Main Head and Sub Head.		
9.4.24	Creditors Aged Analysis: analyze Creditors (Supplier wise / Main A/c / Sub A/c wise) ageing		
	as a synopsis according to pre-defined days range along with the On A/c and Net Value		
	figures (as of date) and facilitates users to analyze creditor aging on the basis of supplier		
	account or document number and provides due date details		
9.4.25	Statement of Payables: Analyze supplier-wise Invoices and Payments against those		
	invoices and balance payables. In addition, it displays details of the PDC and ageing of the outstanding amount (Local Currency Transactions only).		
9.4.26	Supplier Outstanding: Analyze the Outstanding Balance details (Main Account wise) by		
	Company or Supplier, along with the aging in predefined period limits		
9.4.27	Debtors Aged analysis: the list of debtors in a particular parent customer group along with		
	the Main Account Code details for the transactions made within a period. In addition, the details based on Base Currency/Foreign Currency with the data sorted by Due Date or		
	Document Date		
	South Ent Sate		
9.4.28	Statement of Outstanding: Outstanding amounts in Qatari Rial and other foreign currency		
	(e.g. INR, USD Etc.) from a Parent Supplier group in each account within a period. In		
	addition, displays the details based on Base Currency or Foreign Currency with the data		
	sorted by Due date and Document Date		
9.4.29	Payment received for invoices through a cheque number: full listing of the cheques		
51.1125	received from the debtors on invoices for a given period. The interface should allow the		
	users to obtain details by Bank Account or Customer for a given period.		
9.4.30	Cheques received but not deposited: details of the cheques (other than Post Dated		
9.4.31	Cheque) that the company has received. Statement of Account with Matched/Un-Matched Details (Debtors/Creditors): details of a		
3.4.31	particular customer/supplier account with the break-up of the matched & unmatched		
	transactions		
9.4.32	Un-reconciled Book entries : the details of all the un-reconciled book entries by Bank Code		
	and Bank Account Number and also contains the details of the days from which the book		
0.4.22	entries have been un-reconciled.		
9.4.33	Un-reconciled Bank entries: the details of all the un-reconciled bank entries by Bank Code and Bank Account Number and also contains the details of the days from which the bank		
	entries have been un-reconciled.		
9.4.34	Bank Reconciliation Statement: The bank entries based on the Accrual concept. According		
	to this concept, the expense is to be accounted when it is actually accrued and not during		
	payment. In addition, the income is to be realized when it is earned and not on receipt		
0.4.35	basis.		
9.4.35	Payment Notification to the Bank: printing of notification to the bank about payment to suppliers in text format		
9.4.36	Post Dated Cheque (PDC) (Received) on Hand: the list of all Post Dated Cheques that are		
	with the Accounts Department as on date		
9.4.37	PDC Received during a period: the PDC received during a given period of time.	-	
9.4.38	PDC due to be Banked: details of PDCs that are pending for deposit.		
9.4.39	PDC issued during Period: the Post Dated Cheques issued during a particular period. The		
	display of values is in Qatarri Rial. For cheques issued in Foreign currency, the report displays the value in Qatari Rial		
9.4.40	PDC Issued due for payment: the PDC issued to and not realized by the customer.		
	The second of the control of the con		

9.4.41	PDC (Received) on Hand by Division/ Department and Bank: the details of PDC received	
	and available (on hand) with the account details of departments or divisions for a	
	particular bank account as of date. The user is able to generate the report based on a	
	particular Main Bank A/c/Sub Bank A/c Criteria (Customer's Bank Name and Account	
	Number). In addition, the report displays the values in LC (converts PDC received in	
	Foreign Currency into Local currency)	
9.4.42	PDC Received During the Period by Division/ Department and Bank: the details of PDC	
J	received during a period and available (on hand) with the accounts details of departments	
	or divisions for a particular bank account as of date. The user is able to generate the report	
	based on a particular Main Bank A/c/Sub Bank A/c Criteria (Customer's Bank Name and	
	Account Number). In addition, the report displays the values in LC (converts PDC received	
	in Foreign Currency into Local currency)	
9.4.43	PDC Due to be banked by Division/ Department and Bank: the details of PDCs received	
	from customers that are due to be banked as of date with the accounts details of	
	departments or divisions.	
9.4.44	PDC Issued During a period by Division/ Department and Bank: the PDCs issued during a	
	particular period to the suppliers from departments or divisions through a particular Bank	
	A/c.	
0.4.4-		
9.4.45	PDC Due for Payment by Division/ Department and Bank: the details of PDCs issued that	
	are due for payment as of date in a particular division / department for a particular bank	
	account, due date wise. This report is also used as a cheque register-issued document	
	, ,	
	wherein users are able to view cheque details of PDCs issued through a particular	
	department. The report converts and displays the values in LC from FC.	
9.4.46	PDC Confirmation Audit Trial by Division/ Department and Bank: lists the issued PDCs that	
	have been presented at the bank for payment (confirmed) and accounted in books for a	
	selected period, department wise or division wise. This report is generated for a particular	
	bank account or for a range of bank accounts
